BHAVNEET

Software Engineer | Full-Stack Developer | AI-Integrated Web Applications

Meerut, Uttar Pradesh | +91 7417634695 | bhavneetkapasiya23@gmail.com | github.com/bhavneetkapasiya23-web

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence with hands-on experience designing, developing, and deploying full-stack web applications. Skilled in JavaScript, Python, Java, SQL, React.js, Node.js, Express.js, PostgreSQL, REST APIs, JWT authentication, Stripe integration, WebSockets, and LLM API integration. Seeking a Software Engineer, Full-Stack Developer, or AI-focused internship/entry-level role.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, SQL
Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS, Recharts
Backend: Node.js, Express.js, REST API Design, JWT Authentication, WebSockets
Databases: PostgreSQL, Neon PostgreSQL, Prisma ORM
AI / Machine Learning: Artificial Intelligence, Prompt Engineering, LLM API Integration, OpenRouter API
Tools & Platforms: Git, GitHub, Vercel, Postman, VS Code, Stripe API
Computer Science: Data Structures and Algorithms, Object-Oriented Programming

PROJECTS

AI Website Builder — 2025

React.js, Node.js, Express.js, PostgreSQL, Prisma, OpenRouter API, Stripe

- Developed a full-stack AI-powered website generator that converts natural-language prompts into complete deployable websites using the OpenRouter API.
- Implemented a credit-based usage and payment system using Stripe, enabling users to purchase and consume generation credits.
- Implemented secure JWT-based authentication and authorization for user accounts and protected API routes.
- Designed database models for users, projects, credits, and payment records using PostgreSQL and Prisma ORM on Neon.
- Deployed the application on Vercel, completing the full development-to-production deployment lifecycle.

Live Demo: AI Website Builder

Real-Time Stock Dashboard — 2025

React.js, TypeScript, Recharts, WebSockets

- Developed a responsive stock market dashboard that streams and renders live price data using WebSockets.
- Built reusable, strongly typed TypeScript components with Recharts to visualize price trends and historical market movement.
- Structured client-side state management for continuous incoming data streams to maintain smooth UI performance.

Live Demo: Live Stock Dashboard

AI-Powered Observability Platform — 2026

React.js, Tailwind CSS, TypeScript, AI Anomaly Detection, REST APIs

- Engineered an AI-assisted cloud observability dashboard (GleanInsights) for system metrics, microservice distributed logs, and automated root-cause anomaly detection.
- Building a responsive component-driven React interface with modular telemetry widgets, latency heatmaps, and error rate monitoring.
- Integrated AI-based anomaly detection and automated root-cause analysis for accelerated incident triage.

Live Demo: Glean Insights

EDUCATION

Bachelor of Technology, Computer Science and Engineering (Artificial Intelligence) — 2023 – Pursuing
Meerut Institute of Engineering and Technology (MIET), Meerut, Uttar Pradesh

Senior Secondary (Class XII), CBSE — 2022 – 2023
Vardhman Academy, Meerut, Uttar Pradesh

Secondary (Class X), CBSE — 2020 – 2021
Vardhman Academy, Meerut, Uttar Pradesh

CERTIFICATIONS

JavaScript Fundamentals — GreatStack | React Hooks Course — GreatStack

CORE STRENGTHS

Problem Solving | Analytical Thinking | Communication | Teamwork | Adaptability | Time Management
